Where to from here?

We will be relaying to government and relevant organisations, agencies and people that they need to hear the voices of Aboriginal and Torres Strait Islander peoples and provide more resources to develop local programs that can help individuals, families and communities deal with and respond to the high levels of community distress, suicide and the many issues relating to cultural, social and emotional wellbeing.

The National Empowerment Project will assist to further develop a program for each of the 9 sites across the country that:

- responds to the different needs and issues identified by communities
- is well resourced and relevant to local issues
- respects and supports individuals, families and communities to empower and continue peoples journey of healing over the longer term.

We are about to assist in developing a cultural, social and emotional wellbeing program for each of the sites involved in the Project and will continue to work with the communities to ensure that funds are sought and ongoing support is provided.
